COMMENTARY

Net Insurance premium grew by 20% driven by 21% growth in Life Insurance premiums and 16% growth in General Insurance premiums. These are expected to improve further as strategies put together for the year begin to translate into incomes. Overall, Net Income grew by 41% influenced by over 100% increase in Investment Income. Equity values appreciated significantly reflecting the over 30% growth in the GSE Stock Index at the end of Q1 2018.

Total Expenses also grew by 41% impacted by a 108% increase in Actuarial Liability which resulted from some revision to assumptions to reflect current conditions.

Profit after tax was in line with top line growth at 49%

Total Assets went up by 32% due to significant increases in Equity Values as a result of value appreciation.

Net cash generated from operating activities also improved significantly due to improvements in Investment incomes and cash generated from operations.
